GETTING
STARTED
HAS NEVER
BEEN EASIER

CLEANING OUT YOUR GARAGE

Unfortunately, you can't transform your garage without clearing out the one you already have. Here's some helpful tips to get you on your way.

GET YOUR GARAGE READY FOR ACTION IN FIVE EASY STEPS

	What to do...	How to do it...	For example...
1	CLEAR EVERYTHING OUT	Clearing out the entire garage forces you to make a storage decision on every item. No cheating.	There's no example needed here. Get everything out of there!
2	DIVIDE & CONQUER	"Keep or toss" decisions are made easier by separating your stuff into smaller groups of similar items.	Group all of your bikes and bike equipment together. This will help you see that you have 7 bike helmets and 2 bikes. We'll leave the math to you.
3	FINAL DESTINATION	What stays? What goes? What items are headed to the trash heap? Now is the time to decide.	That TV has needed fixing since the late 80s. Designate items like this as the clutter they are. Move them to the trash and get on with your life.
4	KEEP THE BEST	Let's face it, some clutter has sentimental value. Hang on to these memories.	Your child's first fishing pole certainly deserves a place of honor in the garage. Their first fish on the other hand...
5	TOSS THE REST	If you hate it, don't need it, don't want it, can't fix it or can't use it...why is it still in your garage?	Stop banishing wheel-less wheelbarrows, hideous rocking chairs and never-before-used waffle makers to the garage. Find a constructive way to get rid of these items, or toss them.

AVOID DISASTER

Cleaning can be hazardous to your health! A few simple precautions should get you through the day safe and sound.

CHECK THE WEATHER
Nothing's worse than working in bad weather. Schedule your organization for a day with a positive forecast.

DRESS FOR SUCCESS
To protect yourself from sharp and rusty objects, proper clothing is a must. Wear shoes (not sandals), gloves, long sleeves and pants.

LIFT WITH YOUR LEGS
If you're going to be lifting heavy objects, use your legs. Your back will thank you.

WATCH FOR FALLING OBJECTS
Cleaning off those perilously stacked shelves can be risky business. Take extra care in these hazardous situations.

CLEARING CLUTTER

Four constructive ways to eliminate garage hodgepodge.

MAKE IT FUN!

Cleaning the garage doesn't have to be a chore.

JAM OUT
Make a mix CD or a funky playlist and rock out with your mop out.

CLEAN TO WIN
Make it a game or friendly competition. This works great for motivating kids.

RACE YOURSELF
Set a timer for tasks and see if you can beat the buzzer. You'll win every time.

MAKE IT AN EVENT
Since the garage holds the entire family's stuff, use cleaning as an excuse to spend time together.

HOW LONG WILL IT TAKE?

How much stuff you have and how fast you can make decisions are two big factors in how long it could take you to clean out your garage.

Since these factors vary from person to person and garage to garage, you are the only one who can figure this one out.

As a rule of thumb, always give yourself more time than you think you need. This way, you won't end up in a major time crunch.

A LITTLE PLANNING...

Can go a long way and can help you avoid unnecessary headaches later. Plus, a little bit of foresight can save you time and money in the future.

GET YOUR DIMENSIONS

Make sure to measure these things first:

- A. Front, back and side walls
- B. Windows, outlets and switches
- C. Doors, including doorstep
- D. Floor space

Once you get these measurements, use the Gladiator Brand Blueprint Estimator at GladiatorGW.com to help you design a layout that works best for you.

Q The product pages found later in this guide feature the dimensions for all of our products. Compare these to your newly acquired garage measurements for easy planning.

PLAN YOUR WAY

Remember those awesome garage spreads we showed you? Use them to develop a garage plan that's perfect for you. Then, use our planning resources to visualize your plan.

You don't have to stick to one way of planning. A combination of planning styles could work best for you.

1. PLAN ONLINE

BLUEPRINT ESTIMATOR — The Gladiator Brand Blueprint Estimator allows you to plan your garage online. Simply enter your garage's dimensions and witness, first hand, the difference Gladiator® GarageWorks can provide. Check it out at GladiatorGW.com

2. SKETCH IT OUT

Get out a piece of paper and sketch your ideal garage. Don't worry if you're not an artist, the sketch is just a place to start.

3. ASK THE PROS

Want more help? Get some personal advice from your local garage dealer. These experts can help get you back on the fast track if you find yourself lost.

WHAT'S YOUR STYLE?

Keep these preferences in mind when planning your new garage.

OUT AND ABOUT?

If you like to showcase your items while keeping them off the floor and easily accessible, consider a garage plan featuring an assortment of shelves and hooks.

FLEXIBLE, VISIBLE AND CONTAINED?

If you want your stuff visible, but safely secured and easy to move, you'll want to stock your garage full of flexible, easily adjustable baskets and bins.

HIDDEN AWAY?

If you prefer to hide your clutter behind the sleek look of cabinets, Gladiator brand provides a series of stylish cabinets and drawers that will create that desired look without sacrificing storage space.

There are many ways to store any item you own. Luckily, the Gladiator® system maximizes flexibility. Here's a list to help you explore the best way to store several common garage items.

X = Our recommendation **O** = Other options

ITEMS TO STORE	HOW TO STORE IT				
	Hook	Basket	Shelf	Drawer	Cabinet
Balls		X			O
Beach toys		X	O		O
Bicycles	X				
Brooms, Rakes	X				O
Camping equipment		O	X		O
Canoes, Kayaks	X				
Car seats	X		O		O
Cleaning products			O	O	X
Cords, Hoses, Rope	X	O		O	
Fishing rods	X				O
Hand tools	X			O	O
Holiday decorations		O	O		X
Ladders	X				
Lawn chairs	X				O
Lumber	O		X		
Paint cans			O	O	X
Pesticides		O	O	O	X
Plumbing supplies				X	O
Power tools	O			X	O
Skis, Snowboards	X				O
Weed trimmers	X				O
Wheelbarrows	X				

Using this table as a template, create your own to include any other items you have that need to be stored in the garage. This will help you determine which products you will need.

CREATING A WALL ORGANIZATION SYSTEM

Using your walls for storage is a great way to get gear up off the floor and maximize space. It also provides you with flexible storage options that transform your garage into a space you can actually use.

GearTrack® Channels

GearWall® Panels

1

CHOOSE A WALL SYSTEM

Gladiator® Wall Systems are patented "slat wall" style tracks made for hanging Gladiator® Hooks, GearBoxes, Shelves, Baskets, Bins and Accessories.

Choose between GearTrack® Channels, GearWall® Panels or combine them for a customized look.

GEARTRACK® CHANNELS

Provide a simple solution to quickly organize your garage without needing to make a full-wall commitment.

GEARWALL® PANELS

Provide a full-coverage wall organization system that offers complete storage flexibility for those often-rearranged items.

2

INSTALL THE TRACK

Gladiator® Wall Systems easily install on a variety of walls, including masonry, wood studs or drywall over wood studs.

Here's an example of how to install GearWall® Panels on drywall over studs.

1. LOCATE AND MARK WALL STUDS

To support accessories and storage items, the panels must be securely fastened to wall studs.

2. INSTALL THE BOTTOM PANEL

Start from the bottom of the wall and secure one side of the panel with appropriate screws. Set a level on the top of the panel and slide the panel up or down until level and then secure the other side.

3. INSTALL THE REMAINING PANELS

Now, just slide the remaining panels left or right until they're properly aligned with the bottom. Stagger the panels for a more visually appealing look and install them with screws.

4. CUT PANELS AS NEEDED

Easily customize panels to fit around garage windows and doors with a simple circular saw or miter saw.

FOR COMPLETE INSTALLATION INSTRUCTIONS, VISIT GLADIATORGW.COM.

3

ADD ACCESSORIES

Adding hooks, shelves, baskets, bins and GearBoxes to your GearTrack® or GearWall® system is a snap.

Installing hooks & accessories on Gladiator® Wall Systems is as easy as 1, 2, 3.

INSERT BRACKET INTO TOP CHANNEL

SECURE BOTTOM TAB

PUSH DOWN TO "LOCK" IN PLACE

COMPLETE FLEXIBILITY:
ALL ACCESSORIES EASILY REPOSITION
ALONG GLADIATOR® WALL SYSTEMS
TO ADAPT TO YOUR CHANGING NEEDS.

USING GEARBOX CABINETS TO ORGANIZE AND STORE YOUR GEAR

Cabinets are a great choice for people who want to clear items from the floor and keep them safely hidden behind stylish, lockable Tread Plate doors.

CHOOSING THE RIGHT SIZE

Some people don't need a lot of storage space, others can't get enough. Fortunately, Gladiator® GearBoxes come in various sizes to meet any need.

WHAT MAKES A GLADIATOR® GEARBOX THE PERFECT GARAGE CABINET?

SAFETY

Not being able to lock up gear can be a real hazard, especially if there are young children about. Most Gladiator® GearBoxes feature universal lock systems, keeping your family, and your gear, safe.

CONSTRUCTION

Gladiator® GearBoxes are designed to handle the harsh garage environment. Heavy-duty steel construction won't warp or crack in intense climates, and they're guaranteed to hold up over years of use.

ON THE WALL OR ON THE FLOOR

Gladiator® GearBoxes are engineered for the wall, the floor or both. Which is right for you?

ON THE WALL

Wall GearBoxes hang on Gladiator® wall systems to help free up floor space, giving you room for other things in the garage. This is especially useful if your garage is prone to flooding.

ON THE FLOOR

Gladiator® Modular GearBoxes and larger Gladiator® GearBoxes are designed to rest on the floor. The Premier Series comes with standard rubber casters, and the RTA Series Modular GearBox has an optional Caster Kit available, making it easier than ever to rearrange your garage.

YOUR CHOICE

Many larger Gladiator® GearBoxes offer the flexibility to choose between resting them on the floor or hanging them on Gladiator® Wall Systems. Assess your needs and choose the option that best suits you. Wall Bracket Kits are included with some GearBoxes and sold separately for others.

Q GEARBOX HOW-TO

ADJUST SHELIVING

Simply choose a position, insert the side tabs of the shelf above the built-in cabinet grooves and set the shelf into place.

LOCK CASTERS

Turn the lever located on the casters clockwise to lock them and counterclockwise to unlock them.

INSTALL BRACKET KIT

The Premier and RTA Bracket Kits connect with a few screws, making it easy to hang larger GearBoxes on our wall systems.

CHOOSING THE RIGHT WORK SURFACE

For many, a good work surface is an essential part of the garage. Choosing the surface that suits you best guarantees you'll always have a solid foundation to build upon.

WHAT WORK SURFACE DO YOU NEED?

With a variety of work surfaces to choose from, pick the ones that best fit your needs.

A. MODULAR MAPLE WORKBENCH

Ideal for the consummate handyman. Supports up to 1,000 lbs. to handle almost any project you may have planned for it.

B. VERSATOP™ WORK SURFACE

Solid MDF surface installs on two Gladiator® modular components, creating a Workbench wherever and whenever you need it. Great for smaller spaces in need of some versatility.

C. MODULAR MAPLE TOP

Fits on top of any Premier Modular GearBox or GearDrawer, creating a simple work top perfect for the occasional, small repair.

D. FOLD-AWAY WORKSTATION

Saves floor space by hanging on Gladiator® Wall Systems and folding away when not in use. Ideal for light repairs in a tight space. Great for potting plants, too!

CHOOSING THE BEST LOCATION FOR YOUR WORK SURFACE

The best location for your work area usually depends on the size of your garage.

Here are some pointers to help you set up a workstation that works best for you.

WHEN CHOOSING A SPOT FOR YOUR WORK SURFACE, BE SURE TO LOOK FOR:

1. Good lighting
2. Room to work
3. Access to electrical outlets

In a small garage, placing your work surface on the side is usually the best option.

In the average two-car garage, the back wall is the ideal place for your work surface.

Three-car garages often allow you to arrange work surfaces in an L-formation. This creates a highly functional work center.

Large garages often provide enough room for any number of possible work surface placements, although a long row of back wall workbenches is often the easiest option.

Q TIPS FOR KEEPING A TIDY SURFACE

KEEP A TRASH CAN NEARBY

A garbage can or compactor will help keep debris from cluttering up your work area.

HANG TOOLS CLOSE TO YOUR BENCH

It's much easier to put a tool in its proper place when that proper place is right next to your work area.

HANG PLENTY OF BINS

Keeping screws, nails and other small items stored away in a group of bins will help keep your surface tidy.

DOCK A MODULAR GEARBOX

Dock a Modular GearBox or GearDrawer under your Workbench for easy access to frequently used items.

PROTECTING YOUR FLOOR

A covered garage floor is easier to install than you might think and adds style and protection to an area of the garage that's often overlooked.

ROLL FLOOR COVERING

- Roll floor covering has fewer seams, providing you with the greatest protection.
- Easy to install. Unrolls easily and sets into place without adhesives.
- Great for a complete, wall-to-wall finished look.

TILE FLOOR COVERING

- Easy to install. Snaps in place quickly and stays without adhesives.
- Customizable. Design a floor that's all you with a variety of available colors.
- Go all out or tile only those places where you need it.

BEFORE YOU INSTALL, REMEMBER TO:

MEASURE

"Measure twice, floor once," that's our motto. Maybe not, but being as precise as possible will save you time, money and sanity.

CLEAN

Cleaning a floor that you're about to cover may seem silly, but it's necessary to keep dirt and debris from bothering you later.

ROLL FLOOR INSTALLATION

1. To avoid warping, take your floor covering outside and let it sit in the sun before installation.
2. Unroll the floor covering from side to side, moving out toward the door.
3. Remember to brush out air bubbles as you lay the floor covering.
4. At the opposite wall, leave extra covering, then cut for a precise fit.
5. Repeat steps 1-4, butting the remaining pieces together at the seams.

TILE FLOOR INSTALLATION

1. Place the tile from front to back in a 'T' shape. This will help determine if you'll need to cut tiles to fit.
2. If you need to cut tile, cut it so the tile will have to be placed around the whole perimeter. It's more work, but it looks much better.
3. After you have cut and placed the perimeter tiles, fill in the rest of your garage using the male and female interlocking loops.

WHY COVER THE GARAGE FLOOR?

You may be wondering what the point is to improving the look of a floor that takes a beating on a regular basis.

Gladiator® floor coverings add style to your garage floor, but also protect it from the daily hazards of the garage environment.

Imagine a garage floor that doesn't chip when you drop a hammer, crack in cold weather or allow oil spills to set in and stain.

Now, imagine a floor that does all this, and looks incredible.

USING APPLIANCES IN THE GARAGE

Other appliances aren't meant for the garage, Gladiator® appliances weren't meant for anyplace else.

BENEFITS OF USING APPLIANCES DESIGNED SPECIFICALLY FOR THE GARAGE

- + Other appliances may sweat when the heat is on, but Gladiator® refrigerators and freezers keep their cool, even in the hottest garages.
- + Never be forced to work around appliances again. Heavy-duty locking rubber casters provide complete mobility.
- + The garage may be freezing, but your food never will. Unless, of course, it's inside a freezer.
- + The heavy-duty steel design won't crack, chip or fade—even in extreme garage conditions.

MAXIMIZE YOUR GARAGE BY REDUCING YOUR GARBAGE

The garage is famous for accumulating trash and junk. That's just not our style. Owning a trash compactor makes it easy to decrease the size of that unwanted mess. Reduce the amount of trash bags needed and save time by making trips to the curb a less frequent affair. See Page 51

UNCONVENTIONAL USES FOR GARAGE REFRIGERATORS OR FREEZERS

You don't need us to tell you that a refrigerator is a good place for food and drinks (at least we hope you don't). With that in mind, we have compiled a list of uses for a garage refrigerator or freezer that you might not have considered.

GARDENERS:

> Store bulbs and seeds in the garage refrigerator or freezer to help them keep their viability and stay ready for quick planting.

SOCCER MOMS (AND DADS):

> Keep cold packs in the freezer to combat swelling in case of a sprained ankle.
> Fill spray bottles with water and keep them in the fridge for a refreshing spritz after working out or winning the game.

FOR FISHING:

> The garage refrigerator is the perfect place to keep any type of bait for your next fishing trip.

WHEN PAINTING:

> Instead of cleaning brushes you plan on using again the next day, store them in the freezer. The paint will thaw when you take them out and be ready to go!

HOBBYISTS:

> Storing your glues in the refrigerator will help them last longer and reduce dangerous glue fumes.

CREATIVE PLACES FOR GLADIATOR® PRODUCTS

Gladiator® GarageWorks: It's not just for the garage anymore. (Okay, it still is, but here are some other neat ideas.)

Create a key organizer in minutes. Keep track of all those keys...and never be late to work again!

ALL YOU NEED:

- 1 - GearTrack® Channel cut in half
- 5 - J Hooks
- 2 - GearTrack® End Caps
- 1 - Box of Color Matched Screws

Key Organizer

Hang coats, hats and other items right by the door, keeping you organized and on your way.

ALL YOU NEED:

- 2 - GearWall® Panels
- 13 - J Hooks
- 9 - L Hooks
- 1 - Box of Color Matched Screws
- 1 - Small Item Bin

Entry Way

Quickly and easily create a personalized laundry caddy that's actually strong enough to hold everything you need it to.

ALL YOU NEED:

- 3 - GearWall® Panels cut in half
- 2 - L Hooks
- 2 - Wire Baskets
- 1 - Box of Color Matched Screws

Laundry Room

Easily turn the ultimate organization system for your garage into an ultimate entertainment system.

ALL YOU NEED:

- 1 - Fold-Away Workstation
- 4 - GearTrack® Channels
- 4 - 30" Shelves
- 4 - GearTrack® End Caps
- 1 - Box of Color Matched Screws

- + Model # GAFC0824PN, GAFC0830PN, GAFC0836PN

UL Classified for fire resistance and slip resistance.

8' wide roll means you can cover a lot of floor in a little time!

Easy to install, just lay it and leave it.

Wipes clean in a flash.

Strong enough to easily support all sizes of garage vehicles.

Chillerator® Garage Refrigerator

FEATURES

- + Traditional combination of refrigerator and freezer space
- + ENERGY STAR® qualified
- + Signature Tread Plate design
- + Keeps internal temperatures consistent, even in extreme heat/cold
- + 1-Year Limited Warranty*

SPECIFICATIONS

- + 29.5" W x 73.125" H x 31.5" D
- + 14 cu. ft. refrigerator on bottom
- + 5 cu. ft. freezer on top
- + Model # GARF19XXPK

Frost free defrost results in energy savings and less freezer burn.

Double Pass Heat Loop reduces condensation buildup.

Built-in heater ensures that refrigerated items remain chilled, not frozen, even in harsh garage environments.

Solid rubber casters make rearranging smooth and simple.

Reversible door swing can be changed to fit your style.

*Visit GladiatorGW.com for complete warranty details.

Appliances

Gladiator® appliances are the only garage appliances designed and built by Whirlpool Corporation.

Appliances

Gladiator® appliances coordinate with the rest of your Gladiator® products to create an attractive, uniform look.

Freezerator® Convertible Refrigerator / Freezer

FEATURES

- + Unique upper compartment can be changed from a refrigerator to a freezer
- + Signature Tread Plate design
- + Keeps internal temperatures consistent, even in extreme heat/cold
- + Casters for easy mobility
- + 1-Year Limited Warranty*

SPECIFICATIONS

- + 32.5" W x 73.125" H x 31.5" D
- + 15 cu. ft. freezer compartment on bottom
- + 6 cu. ft. convertible refrigerator/freezer compartment on top
- + Model # GAFZ21XXRK

Choose your chill factor with an upper compartment that changes from a refrigerator to a freezer at your convenience.

Large lower compartment keeps food frozen, even in sweltering summer heat.

Double Pass Heat Loop reduces condensation buildup.

Built-in heater ensures that refrigerated items remain chilled, not frozen, even in harsh garage environments.

Door-mounted beverage rack holds 24 12-oz. cans or 20-oz. bottles.

With a turn of the dial, the refrigerator becomes a freezer.

Extra-wide, extra-deep baskets store more items.
